Ronak P. Mistry

MECHANICAL DESIGN ENGINEER | PRODUCT DEVELOPMENT | MECHANICAL SYSTEMS & MANUFACTURING

Phone: 437-989-0102 | **Email:** ronak.mistry98@gmail.com|linkedin

PROFESSIONAL SUMMARY

Mechanical Engineer with 3+ years of Canadian mechanical design experience and a background in manufacturing. Skilled in SolidWorks, Autodesk Inventor, and AutoCAD, with expertise in 3D modeling, mechanical assemblies, engineering drawings, BOMs, design verification, and manufacturing support. Experienced in design-for-manufacturability, technical problem-solving, and cross-functional collaboration.

SKILLS & INTERESTS

Mechanical Design & Product Development: 3D CAD Modeling, Mechanical Assemblies, Component Design, Equipment Design, Design Modifications, Engineering Drawings, Sheet-Metal Design, Fabricated Components, Mechanical Interfaces

Design Engineering: Design Verification, Dimensional Analysis, Tolerancing, GD&T, Engineering Calculations, Design-for-Manufacturability (DFM), Design-for-Assembly (DFA), Technical Problem-Solving, Engineering Change Management

Testing & Manufacturing: Mechanical Assembly, Prototype and Equipment Testing Support, Fabrication, Machining, Quality Inspection, Precision Measurement, Troubleshooting, Production Support, Manufacturing Documentation

Project & Technical Coordination: Customer Specifications, BOM Development, Material Take-Offs, Revision Control, Technical Documentation, Supplier Coordination, Procurement Support, Cross-Functional Collaboration

Software: SolidWorks, Autodesk Inventor, AutoCAD, Mastercam, Odoo ERP, Microsoft Office

WORK EXPERIENCE

Power Bus Way, a Legrand Company — **Mississauga, ON, Canada**

Mechanical Designer (Promoted from Junior Mechanical Designer) — *Jun 2023 – Present*

- Develop 3D CAD models, mechanical assemblies, layouts, and engineering drawings using Autodesk Inventor, SolidWorks, and AutoCAD.
- Design and modify mechanical assemblies, sheet-metal components, fabricated parts, supports, and enclosures based on customer requirements.
- Review customer drawings, specifications, and 3D models to verify dimensions, tolerances, clearances, interfaces, and manufacturability.
- Prepare and maintain BOMs, material requirements, fabrication drawings, assembly drawings, and technical documentation.
- Implement engineering changes and design improvements based on customer requirements and manufacturing feedback.
- Collaborate with Engineering, Manufacturing, Production, Purchasing, Project Management, and suppliers to resolve technical issues.
- Provide technical support for fabrication, machining, assembly, production, and troubleshooting.
- Identify design and manufacturing issues and support practical engineering solutions.

Centennial College **Toronto, ON, CANADA**
Manufacturing Laboratory Technician *(During 2 years of Diploma Program)*

- Set up, operated, and troubleshot hydraulic and pneumatic systems, including pumps, valves, cylinders, and pressure controls.
- Performed mechanical testing, pressure and flow measurements, and basic system performance evaluations.
- Assisted with mechanical assembly, machining, fabrication, and testing of laboratory equipment.
- Conducted precision measurements and inspections while following laboratory safety procedures.

EDUCATION

Centennial College of Applied Arts and Technology **Toronto, ON, Canada**
*Post-Graduation Diploma in **Industrial Engineering*** *Graduation Year: April 2023*

Gujarat Technological University **Gujarat, India**
*Bachelors in **Mechanical Engineering*** *Graduation Year: June 2019*

Gujarat Technological University **Gujarat, India**
*Diploma in **Mechanical Engineering*** *Graduation Date: May 2016*

PROJECT COORDINATION & ENGINEERING CONTRIBUTIONS

- Coordinated engineering deliverables across multiple projects and production phases.
- Reviewed customer specifications, drawings, and 3D models to verify dimensions, clearances, interfaces, and installation requirements.
- Maintained CAD models, engineering drawings, BOMs, revisions, and manufacturing documentation.
- Supported design changes, technical issue resolution, design verification, and manufacturing implementation.
- Collaborated with Engineering, Manufacturing, Purchasing, Production, Project Management, and suppliers**.**

Custom Cable Bus Systems

- Supported the mechanical design of an adjustable penetration system, addressing installation requirements, tolerances, fabrication, assembly, and manufacturability.

CERTIFICATIONS & PROFESSIONAL AFFILIATIONS

CSWA Certified | OACETT Member | P.Eng. Applicant
